 - Manufactured from recycled HDPE.
-

📏 Specs

- 2 Mil HDPE plastic
 - 5" X punch out in middle
 - UV Treated to last 4-5 years
-

📄 Details

WHY WEED PRO IS DIFFERENT THAN OTHER WEED MATS?

- The price includes the staples.
- Weed Pro retains moisture 3 to 6 weeks longer than other mats that are porous.
- Porous mats allow moisture to freely transfer thru the mat drying the soil.

HERBICIDE NOT BEST CHOICE

Spraying herbicide is risky business. You could damage, even destroy the trees, if your workers aren't careful. A simple shift in the wind could mean a bunch of dead trees. Besides, chemical solutions are rarely the best solution.

Weed mats are environmentally friendly. They don't leach into the soil and end up in the water table. They won't blow away in the wind and poison your neighbor's flowers.

🌿 Installation

WEED MAT INSTALLATION TIPS

- It is best to have the weeds/grass cut as low as you can – 2" or less.
- Dog ear the corners to get 2 layers of material when installing sod staples
- We recommend doing weed control beyond the mat to control rodents.
- Weed Pro may retain moisture for 3 to 6 weeks during a drought based on your soil type.
